FOR IMMEDIATE RELEASE

*April 4, 2025*

## **OXFORDGC SUCCESSFULLY RENEWS ISO 27001:2022**

### ***OXFORDGC CONTINUES TO MOVE FORWARD IN 2025 WITH AN ENHANCED FOCUS ON INFORMATION SECURITY***

**North Beach, Maryland**

**North Beach, Maryland, April 4<sup>th</sup>, 2025** – OxfordGC is pleased to have originally obtained its International Organization for Standardization (ISO) 27001:2022 information security management system certification standard on May 7, 2024. ISO 27001:2022 was again successfully audited by the National Quality Assurance (NQA) USA group as part of OxfordGC's Surveillance 1 audit in early April 2025 with the validity of Certificate Number 19520 extended until May 6, 2027.

**Gregg Kelly, CEO and President** commented: *"In an age of increasing data usage and the risk of information security breaches and cyber-attacks, the benefits of an OxfordGC ISO 27001:2022 Information Security Management System (ISMS) are clear. Not only can it help to minimize the chance of breaches occurring, but it can also reduce the costs associated with keeping information safe. ISO 27001:2022 is one of the world's best-known International Standards for the requirements of an ISMS, and the requirements set out in ISO 27001:2022 are exactly where OxfordGC will continue to posture our firm and our clients within secure environments that are supported by safeguards that are critical to protecting information and assets. Keeping sensitive information and our data landscapes safe and secure is essential for our company."*

**Ashley Hunsinger, Contracts Manager** commented: *"The first and most important benefit of implementing ISO 27001:2022 is improved risk management and secure information security processes. ISO standardizes the way information security is managed within our organization. Based upon a robust risk management framework, ISO implements a top-down approach, which requires that all our staff have an appropriate level of information security understanding."*
